# ISHATVA GUPTA

9140148267 | ishatvag4@gmail.com | ishatva-gupta.linkedin.com | ishatva04.github.io

## PROFESSIONAL SUMMARY

Python Backend Developer with hands-on experience building scalable REST APIs and full-stack web applications using Django, FastAPI, PostgreSQL, and SQLite. Strong foundation in Data Structures & Algorithms, secure authentication (JWT), and database schema design. Proven ability to deliver production-ready applications from design through deployment.

## TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, C/C++, Bash/Shell Scripting
- **Backend & APIs:** Django, Django ORM, FastAPI, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, SQLite
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Django Admin Panel
- **Cloud (GCP):** Cloud Run, Google Kubernetes Engine (GKE), CI/CD (Cloud Build, Artifact Registry), IAM & Service Accounts, Terraform, API Gateway, Cloud Load Balancing & Networking, App Engine
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Database Schema Design

## WORK EXPERIENCE

**Backend Developer Intern — EaseOps, Bengaluru** *Jun 2025 – Jul 2025*

- Developed and tested RESTful APIs using Python and FastAPI for an AI-driven healthcare platform, ensuring secure and scalable backend services.
- Designed PostgreSQL database schemas and implemented JWT authentication to secure user data and API endpoints.
- Performed API testing with Postman and collaborated with the engineering team using Git/GitHub to streamline development workflows.

## PROJECTS

**QuickBite — Food Ordering Platform** *Aug 2026*

- Built a full-stack food ordering web application using Django MVT architecture, implementing user authentication, menu management, and CRUD operations for food items.
- Integrated Django ORM with SQLite for data persistence; used Django Templates and static files for a dynamic UI, and managed the codebase via Git/GitHub.
- **Tech Stack:** Python, Django, SQLite, HTML, CSS, JavaScript, Bootstrap, Git | github.com/Ishatva04/QuickBite

**Tweet — Social Media Web Application (Live)** *Jul 2026*

- Developed a full-stack social media application using Django, enabling users to register, log in, and create, edit, and delete posts with secure authentication and role-based access control.
- Integrated Django ORM with SQLite for data management, implemented image upload functionality, and deployed the application on Vercel for public access.
- **Tech Stack:** Python, Django, SQLite, HTML, CSS, Bootstrap, Git, GitHub | tweet-start15.vercel.app

**Exercise Pose Correction System — AI-Based Fitness Posture Analysis** *Dec 2025*

- Built a real-time AI-powered posture correction system using YOLOv8 and MediaPipe to detect exercises, track body landmarks, and calculate joint angles for posture analysis.
- Integrated OpenCV for live video processing and Streamlit for an interactive web interface, providing instant Good/Bad posture feedback.
- **Tech Stack:** Python, YOLOv8, MediaPipe, OpenCV, Streamlit, NumPy | github.com/Ishatva04/Exercise-Posture-Correction-System

## EDUCATION

**Bachelor of Technology (B.Tech) — Computer Science & Engineering** *2022 – 2026*

Rajkiya Engineering College, Mainpuri, UP (Affiliated to Dr. APJ Abdul Kalam Technical University, Lucknow, UP)

## CERTIFICATIONS

- **Google Cloud Skills Boost — Diamond League (Arcade Program, 111,000+ points):** Completed 100+ hands-on labs across Cloud Run, Google Kubernetes Engine (GKE), CI/CD Pipelines (Cloud Build, Artifact Registry), IAM & Service Accounts, Terraform (Infrastructure as Code), API Gateway, Cloud Load Balancing & Networking, and App Engine.
